

THIS WEEK IN TELECOM

June 8 - June 12, 2015

1 - Bell Promises Up to 220 Mbps Download Speeds

Bell LTE-A network is marketing 220 Mbps as one of the fastest speeds in the world.

2 - LTE Peaking at USD 6 Billion a Quarter

LTE rollouts were not strong enough in quarter 1 of 2015 to offset 2G/3G decline.

3 - Apple Working on High Speed Data Network

Apple is working on a high-capacity network and upgrading the build of its data centers.

4 - Counting People With WiFi

Researchers are proving that wireless signals can do more than provide Internet.

5 - Square Will Launch a New Reader This Fall

The new reader will accept Apple Pay and credit card chip payments.
